

5th Annual California Passenger Rail Summit

2017
CALIFORNIA
PASSENGER
RAIL SUMMIT

TUESDAY, APRIL 18, 2017
WEDNESDAY, APRIL 19, 2017

April 18, 2017

On behalf of the Host Committee we welcome you to the 2017 California Passenger Rail Summit!

Over the next two days, you can look forward to participating in thought-provoking panel discussions and learning about innovative resources and technology, as well as developing professional connections with colleagues in the passenger rail industry.

Since our first summit, we can truly see that passenger rail services are starting to bear the fruit of the harvest thanks to prior investments. Collectively, California agencies are introducing new locomotives into revenue service, constructing new stations, and extending train service in conjunction with added frequencies to meet growing demand.

This year's summit will provide a platform for you to:

- Exchange best practices throughout our network of peers in the industry
- Catalyze job creation and economic growth
- Invest in sustainable resources to promote healthy communities

During the conference, you will hear from officials at the California State Transportation Agency, California High-Speed Rail Authority, and passenger rail providers who are at the forefront to deliver high quality passenger rail service to Californians.

Thank you for being a part of this year's summit!

David Kutrosky
Conference Co-Chair

Robert Manning

INDUSTRIAL DESIGN

MECHANICAL SERVICES

DEDICATION SINCE 1986

With expertise in consulting, engineering, manufacturing, industrial design and mechanical services, RailPlan International takes a project from concept, to production, to lifespan assurance. RailPlan's dedicated and highly trained staff designs, engineers, manufactures and installs modifications, award-winning interiors and products that are developed to the highest standards. Our Mechanical Services expert maintenance programs ensure those standards are delivered with the continued safety of passengers and employees as our top focus. RailPlan's goal is to provide quality products and services that surpass the expectations of our customers...all the way through to your passengers. It's what we do, and do proudly.

Experience Matters.

California Passenger Rail Summit

PROGRAM AGENDA - TUESDAY, APRIL 18, 2017

Sacramento County Administration Building: 700 H St, Board Chambers, Sacramento, CA 95814

11:30am – 1:00pm Registration Opens

12:00 – 1:00pm Lunch

Various Locations

1:00 – 3:30pm Technical Tours

Siemens Rolling Stock Manufacturing Facility

Registered attendees will take a shuttle from the Sacramento County Administration Building, departing at 1pm on I Street, to the Siemens facility. Be sure to bring your safety shoes and please be punctual. Late arrivals cannot be accommodated. Shuttle service will be provided to bring you back in time for the start of the Summit at 4pm.

Established in the 1980s, Siemens manufactures a large variety of rolling stock vehicles at its Sacramento plant. From light rail vehicles, streetcars, single-level coaches to electric and diesel-electric locomotives. The plant includes car shell and truck production, subassembly, final assembly, commissioning and testing. Currently in production are streetcars for San Francisco, light rail vehicles for Calgary, complete intercity train sets for the Florida Brightline service and diesel-electric locomotives for intercity passenger rail services in California, the Pacific Northwest, and Midwest states. *(Please note that for confidentiality and competitive reasons, rolling stock manufacturers will not be able to participate in the Siemens Sacramento factory tour.)*

Sacramento Valley Station

Registered attendees will convene at the Sacramento County Administration Building and walk a short distance to the Sacramento Valley Station.

The tour of the Sacramento Valley Station will provide an overview of the three phases of improvements completed and planned for the site. The tour will begin with the completed \$70-million Phase 1 Track Relocation and New Passenger Platforms and the northern edge of the site. The Phase 2 Restoration of the historic station will focus on the rehabilitation of the station programmatically, historically, and the sustainable design practices in the design. The tour will include the Main Waiting Room restoration, provisions for ground floor retail in the former baggage area, second floor lease area, and the third floor roof deck. From the roof deck, a brief overview of the Phase 3 Site Master Plan, now in progress, will be summarized and a Q/A session will conclude the tour.

California State Railroad Museum

Visit the crown jewel of railroad history and take in the sights at the California State Railroad Museum on a self-guided tour of the facility, which is a short walk from the Sacramento County Administration Building.

Experience the feats of engineering and ingenuity that have kept the Golden State connected for nearly 200 years – from immaculately restored engines and cars to exciting events and exhibits that bring the railroad to life. Exhibits cover a wide range of topics, from social issues to displays of railroad artwork intended to promote California and the West as a tourism destination.

California Passenger Rail Summit

PROGRAM AGENDA - TUESDAY, APRIL 18, 2017

Sacramento County Administration Building: 700 H St, Board Chambers, Sacramento, CA 95814

4:00 – 4:30pm Opening Remarks

Introduction: The Honorable Lucas Frerichs, Chair, Capitol Corridor Joint Powers Authority

Welcome: The Honorable Brian Kelly, Secretary, California State Transportation Authority

4:30 – 5:30pm CEO Round Table

Farhad Mansourian, General Manager, SMART

SYSTRA is a specialist in planning, engineering, design, program management, and construction management for transportation systems and their associated facilities. With approximately 6,100 employees, SYSTRA benefits from more than 60 years of international and 30 years of North American experience. Many of our professionals have earned their knowledge as employees of operating railroads, where minimizing operational impacts is the highest priority. We are unique in our transportation system owner/operator vision and culture. Our experts emphasize practical solutions for engineering, operations and maintenance.
