Rahway Valley Railroad
Att. Mr. Clark

Dear Sir: —

About two months ago, I called your attention to a dead elm tree, which is located on your railway property, at the edge of ours, located at 154 Hawthorn Ave. second house up from Tooker Place. In last Saturday's storm, another huge branch was blown down. Your men cut off the fallen branches, where they interfered with the tracks, but left the other parts laying on the hill.

Now, I am warning you, if other huge branches are ever blown down toward our house, it could cause great damage and there is also the danger of branches falling on a person. Branches large enough to injure a person are continually falling on our property.

Please give this matter your serious attention, before something happens.

We would appreciate if you could do this before our garden is springing up and while the ground is still hard.

Thanking you for your prompt attention to this matter.

Very truly yours
Kate J. Scherer
